

## Important Announcement

We are pleased to see our campuses bustling with activity. We have, however, responded to an influx of plumbing drain obstructions caused by inappropriate materials being flushed down toilets. Please note that common materials such as disinfectant wipes, baby wipes, paper towels, and sanitary items **should never** be discarded in a toilet, as a drain line blockage can lead to back-ups and significant building and property damage. These and other non-flushable items should be disposed of in the nearest trash receptacle. Thank you for your cooperation.

## Shoe Snippets

*Fun facts about the historic Cummings Center site, formerly known as "the Shoe"*

---

The Shoe designed and manufactured nearly all of the major parts in its shoe-making machinery, effectively dominating the world market for this type of equipment. It created more than 300 different machines that could be purchased or leased, depending on a company's needs. The Shoe's research division reportedly registered more than 9,000 U.S. patents over the course of its lifespan.
